

A sample report for analyzing the results of a course

College	Department	Subject	Section	test type	test score
College of Computer Science	Department of Computer Science	sub-1	111	internal and final	100

Statistical parameters for students' scores

Students distribution over normal Distribution

Parameter	Value
mean	77.27
Std. Deviation	9.03
Correlation	0.76
Skewness	0.07
Maximum	95.0
Minimum	60.0

Explanation of statistical indicators and the recommendations

Reasons :

The average of students' scores is 77.27, showing that it is greatly above the normal average by 9.27 and the deviation of grades 9.03, is not high and close to normal and the skewness tends to the right, higher than the average. The correlation 0.76 is high, it indicates a strong relation of students' scores between semester and final

Recommendations :

The results indicate a great students performance.
